

brix tite 150

INTEGRAL WATER PROOFING POWDER FOR CONCRETE AND MORTAR ADMIXTURE

DESCRIPTION

Brix tite is a chloride free powder, which seals the capillary pores of concrete and cement mortars thereby blocking water seepages. It is water insoluble and therefore becomes a permanent constituent of hardened concrete. **brix tite** also increases workability.

SPECIFICATION

Conforms to IS 2645 – 1975

ADVANTAGES

brix tite can be used for concrete as well as mortars. It has an active chemical that waterproofs cement effectively. It does not contain limestone like most other powders. It mixes uniformly and thoroughly with cement to make it cohesive and waterproof. Economical – A small quantity is enough to make concrete/mortar waterproof.

DIRECTIONS TO USE

Mix sand and cement as required w/c (ratio 0.45 for best results)
Add **brix tite** and remix.
Add aggregates for concrete and remix
Add water and mix thoroughly to obtain cohesive mix of concrete.

DOSAGE

1 packet of 500gms per bag of cement

PACKING

500gms pouch 20kgs & 50kgs sack.

SHELF LIFE

12 months if stored in manufacturer's sealed packs in a cool and dry place away from moisture and heat.

QUALITY ASSURANCE

brix products are manufactured under strict quality control measures as per manufacturing specifications. If the behavior of the product is varying from the

claims in the data sheets stop the use of the product and contact the nearest **brix** representative.
